

4-WEEK AI ENGINEERING TRAINING PLAN

Learn the foundations, add one powerful layer each week, and finish with one production-ready AI product you can confidently demo.

WELCOME TO MYREALPRODUCT.

Learn, build and ship one capstone through four focused weekly releases.

BEFORE WE
START

WEEK
0

- 1

Join the WhatsApp group
- 2

Pick and understand a problem statement
- 3

Research existing solutions deeply
- 4

Submit your understanding report
- 5

Set up Python, Claude Code & GitHub

01

FOUNDATION

SHIP YOUR AI APP

Outcome: working MVP at a live URL

LEARN PHASE - 6 VIDEO LESSONS

- Claude Code

LangChain

GitHub

FastAPI

Supabase

Vercel

- PLAN

SATURDAY

Plan session: intro, solution, MVP, input → process → output, product flowchart, Q&A + planning template.
- LEARN

SUNDAY

Learn Claude Code, FastAPI and LangChain.
- LEARN

MONDAY

Learn Supabase, GitHub and Vercel. Follow a guided product breakdown showing how the full stack fits together.
- COACH

TUESDAY

Office hours: ideate what to build, agree scope and architecture, unblock questions.
- BUILD

WEDNESDAY

Build: scaffold the app, API and first model flow.
- BUILD

THURSDAY

Build: connect data, frontend and core product flow.
- BUILD

FRIDAY

Build, deploy and submit by end of day.

02

KNOWLEDGE

GROUND IT WITH RAG

Outcome: answers based on trusted source data

LEARN PHASE - 5 VIDEO LESSONS

- Intro to RAG

Pinecone

Advanced RAG

Vector Stores

Types of RAG

- PLAN

SATURDAY

Plan session: RAG architecture, knowledge sources, retrieval quality, MVP upgrade and Q&A.
- LEARN

SUNDAY

Learn RAG foundations, embeddings, chunking and vector stores.
- LEARN

MONDAY

Learn Pinecone, RAG patterns and advanced retrieval through a complete guided RAG build.
- COACH

TUESDAY

Office hours: choose sources, chunking strategy, metadata and retrieval approach.
- BUILD

WEDNESDAY

Build: document ingestion, chunking and vector indexing.
- BUILD

THURSDAY

Build: retrieval, grounded generation and citations.
- BUILD

FRIDAY

Test retrieval quality, improve weak answers and submit by end of day.

03

ACTION

ADD AN AI AGENT

Outcome: a reliable multi-step workflow

LEARN PHASE - 5 VIDEO LESSONS

- AI Agents

Tools

Advanced LangGraph

LangGraph

Graph Patterns

- PLAN

SATURDAY

Plan session: agent goal, workflow, state, tools, safety boundaries and success criteria.
- LEARN

SUNDAY

Learn agent foundations, LangGraph basics and tool calling.
- LEARN

MONDAY

Learn graph patterns and advanced LangGraph through a complete guided agent workflow.
- COACH

TUESDAY

Office hours: map nodes, state, routing, tools and human approval points.
- BUILD

WEDNESDAY

Build: create the graph, state and first working path.
- BUILD

THURSDAY

Build: add tools, routing, memory and failure handling.
- BUILD

FRIDAY

Test complete workflows, record evidence and submit by end of day.

04

PRODUCTION

MAKE IT RELIABLE

Outcome: monitored, evaluated final release

LEARN PHASE - 5 VIDEO LESSONS

- Observability

Evaluations

LLMOps

Langfuse / LangSmith

LiteLLM

- PLAN

SATURDAY

Plan session: production readiness, traces, eval criteria, cost, latency and final demo plan.
- LEARN

SUNDAY

Learn observability with Langfuse/LangSmith and practical evaluation methods.
- LEARN

MONDAY

Learn LiteLLM, prompt caching and prompt versioning through a guided production hardening walkthrough.
- COACH

TUESDAY

Office hours: define eval set, tracing plan, gateway setup and release checklist.
- BUILD

WEDNESDAY

Build: instrument traces, metrics and production logs.
- BUILD

THURSDAY

Build: add evals, gateway, caching and prompt versions.
- BUILD

FRIDAY

Final submission: live app, GitHub repo, demo, results and reflection.
