

AI ENGINEERING COACHING OPTIONS

Choose the learning path that matches the depth of guidance you want. Both options are delivered one-to-one and lead to one demonstrable AI product.

4 WEEKS. 1:1.

BUILD. REVIEW. SHIP.

A focused engagement built around one capstone.

OPTION 01 / INTERMEDIATE

AI PRODUCT BUILDER

\$2,000

4-WEEK PROGRAMME

THE PROVEN ONE-TO-ONE BUILD PATH

- ✓ Four weekly Saturday coaching sessions
- ✓ Weekly one-to-one office hours
- ✓ Recorded lessons and implementation resources
- ✓ Build an AI app, add RAG, create a LangGraph agent
- ✓ Add evaluations, observability and production checks
- ✓ One production-oriented capstone and final review
- ✓ Intermediate MyRealProduct curriculum and sequence

BEST FOR

A structured journey through the complete AI product lifecycle.

OPTION 02 / ADVANCED

ADVANCED AI ENGINEERING

\$3,000

RECOMMENDED

EVERYTHING IN OPTION 01, PLUS

- ✓ The same core curriculum and recorded lessons as Option 01
- ✓ Three additional 60-minute advanced sessions
- ✓ Advanced RAG, retrieval evaluation and reranking
- ✓ Advanced LangGraph and reliable agent architecture
- ✓ Production AI engineering, evaluations and LLMOps
- ✓ Curated technical references and next-step roadmap
- ✓ Deeper architecture and code feedback on your capstone

BEST FOR

An experienced data professional ready to self-build with senior guidance.

OUR RECOMMENDATION

Based on your existing RAG and agent experience, Option 02 lets you move selectively through familiar foundations and adds coaching depth where it matters: retrieval quality, LangGraph architecture and production reliability.

INTERMEDIATE TRAINING PLAN

THE PROVEN FOUR-WEEK, ONE-TO-ONE AI PRODUCT BUILDER PROGRAMME.

BEFORE WE START

WEEK 0

Join the WhatsApp group / Pick and understand a problem statement

Research existing solutions / Submit your understanding report / Set up Python, Claude Code and GitHub

01

FOUNDATION

SHIP YOUR AI APP

Outcome: working MVP at a live URL

LEARN / FOCUS

Claude Code | LangChain | GitHub | FastAPI | Supabase | Vercel

PLAN	SATURDAY	Intro, solution, MVP, flowchart, Q&A and timeline.
LEARN	SUNDAY	Learn Claude Code, FastAPI and LangChain.
LEARN	MONDAY	Learn Supabase, GitHub and Vercel; see the full stack fit together.
COACH	TUESDAY	Ideate the build, agree scope and architecture, unblock questions.
BUILD	WEDNESDAY	Scaffold the app, API and first model flow.
BUILD	THURSDAY	Connect data, frontend and core product flow.
BUILD	FRIDAY	Build, deploy and submit by end of day.

02

KNOWLEDGE

GROUND IT WITH RAG

Outcome: answers from trusted source data

LEARN / FOCUS

Intro to RAG | Pinecone | Advanced RAG | Vector stores | Types of RAG

PLAN	SATURDAY	RAG architecture, sources, retrieval quality, MVP upgrade and Q&A.
LEARN	SUNDAY	Learn RAG foundations, embeddings, chunking and vector stores.
LEARN	MONDAY	Learn Pinecone, RAG patterns and advanced retrieval through a guided build.
COACH	TUESDAY	Choose sources, chunking strategy, metadata and retrieval approach.
BUILD	WEDNESDAY	Build document ingestion, chunking and vector indexing.
BUILD	THURSDAY	Build retrieval, grounded generation and citations.
BUILD	FRIDAY	Test retrieval quality, improve weak answers and submit.

03

ACTION

ADD AN AI AGENT

Outcome: a reliable multi-step workflow

LEARN / FOCUS

AI agents | Tools | Advanced LangGraph | LangGraph | Graph patterns

PLAN	SATURDAY	Agent goal, workflow, state, tools, safety boundaries and success criteria.
LEARN	SUNDAY	Learn agent foundations, LangGraph basics and tool calling.
LEARN	MONDAY	Learn graph patterns and advanced LangGraph through a guided workflow.
COACH	TUESDAY	Map nodes, state, routing, tools and human approval points.
BUILD	WEDNESDAY	Create the graph, state and first working path.
BUILD	THURSDAY	Add tools, routing, memory and failure handling.
BUILD	FRIDAY	Test complete workflows, record evidence and submit.

04

PRODUCTION

MAKE IT RELIABLE

Outcome: a monitored, evaluated release

LEARN / FOCUS

Observability | Evaluations | LLMOps | Langfuse/LangSmith | LiteLLM

PLAN	SATURDAY	Production readiness, traces, eval criteria, cost, latency and demo plan.
LEARN	SUNDAY	Learn observability with Langfuse/LangSmith and practical evaluations.
LEARN	MONDAY	Learn LiteLLM, prompt caching and prompt versioning through a build.
COACH	TUESDAY	Define eval set, tracing plan, gateway setup and release checklist.
BUILD	WEDNESDAY	Instrument traces, metrics and production logs.
BUILD	THURSDAY	Add evals, gateway, caching and prompt versions.
BUILD	FRIDAY	Submit live app, GitHub repo, demo, results and reflection.

ADVANCED COACHING ADD-ON

THE SAME TRAINING PLAN AND RECORDED LESSONS. MORE DEPTH IN COACHING.

WHAT THE EXTRA \$1,000 ADDS

Three additional 60-minute one-to-one coaching sessions, selected advanced references, and deeper feedback as you apply those concepts to your own capstone. No separate library of advanced recorded lessons is promised.

WEEK 01 SHIP YOUR AI APP

CORE RECORDED LESSONS - SAME AS OPTION 01
Claude Code, LangChain, GitHub, FastAPI, Supabase and Vercel.

HOW THIS WEEK WORKS INTERMEDIATE COACHING

Use the normal Saturday session and Tuesday office hours. Familiar material may be reviewed selectively, but the core programme remains unchanged.

WEEK 02 GROUND IT WITH RAG

CORE RECORDED LESSONS - SAME AS OPTION 01
Intro to RAG, Pinecone, Advanced RAG, Vector stores and Types of RAG.

ADVANCED COACHING ADDITION + 60-MINUTE DEEP DIVE

Advanced retrieval choices, hybrid search, query transformation, reranking and how to evaluate retrieval quality in the capstone.

WEEK 03 ADD AN AI AGENT

CORE RECORDED LESSONS - SAME AS OPTION 01
AI agents, Tools, Advanced LangGraph, LangGraph and Graph patterns.

ADVANCED COACHING ADDITION + 60-MINUTE DEEP DIVE

LangGraph architecture, state and routing, retries, fallbacks, memory and human approval - applied as coaching, not a bespoke recorded course.

WEEK 04 MAKE IT RELIABLE

CORE RECORDED LESSONS - SAME AS OPTION 01
Observability, Evaluations, LLMOps, Langfuse/LangSmith and LiteLLM.

ADVANCED COACHING ADDITION + 60-MINUTE DEEP DIVE

Evaluation strategy, tracing, prompt and model versioning, cost, latency and a production-readiness review of the capstone.

INCLUDED IN OPTION 02

- ✔ Three extra private coaching sessions
- ✔ Curated references for the three deep dives
- ✔ Deeper architecture and code feedback
- ✔ Priorities adapted to Sumit's existing knowledge

NOT INCLUDED

- ✔ A separate advanced recorded curriculum
- ✔ A bespoke course created for one participant
- ✔ Extended pair-programming or live implementation
- ✔ Code written on the participant's behalf
